

Gain Confidence in Spreadsheet Results with Xcellerator

Benefits

- Drastically reduces review time
- Significantly reduces material errors & possible fraud
- Helps fulfill audit and compliance reporting requirements

Features

- Finds formula errors, cell accuracy risks, hidden errors & external references
- Generates standard and configurable reports showing risk and potential liability
- Displays results by type and likelihood to identify “hot spots”
- Compares spreadsheets

Xcellerator helps users resolve errors and risks, and gain confidence in their spreadsheet results, by combining powerful error detection with investigative capabilities to comprehensively analyze spreadsheets. Developed for all levels of spreadsheet users, Xcellerator significantly reduces material errors and possible fraud as well as the hours associated with detailed spreadsheet review.

The sophisticated logic in Xcellerator works seamlessly within Microsoft Excel and delivers higher-level functionality and unprecedented accuracy. Unlike other spreadsheet error detection applications, Xcellerator and Microsoft Excel appear as one to the user and the integrity of the spreadsheet application is always maintained—Xcellerator does not modify the spreadsheet.

Powerful Error Detection. Xcellerator scans spreadsheets for possible errors and risks, and displays them within the spreadsheet using an easy, straightforward interface. It identifies errors and risks with greater accuracy than any other solution.

Extensive Tests. The strength of Xcellerator lies in its extensive tests, ranging from formula errors and risks in cell accuracy to hidden errors and broken regions. Xcellerator delivers fast results and superior accuracy so spreadsheet reviewers can eliminate hours of laborious manual checking and management can be confident that material errors and possible fraud are avoided.

System Requirements

- Microsoft Windows® 7/8/10
- Microsoft Office Excel 2010, 2013, 2016, 2019, 365

Sample results that can be found using Xcellerator:

- Formula inconsistencies
- Numbers formatted as text
- Data in a formula range
- Hidden cells and sheets (very hidden too!)
- Forward and external references

Spreadsheet Comparison. Xcellerator delivers an interactive way of comparing spreadsheets to give users visibility into spreadsheet risk to quickly determine if and/or what spreadsheet changes were made—all within familiar Microsoft Excel. Xcellerator is the only solution to also examine and reveal changes to named ranges, as well as properly handle the insertion, deletion and shifting of rows and columns.

Compliance Reporting. Xcellerator helps fulfill audit and compliance reporting requirements. The Summary Report presents spreadsheet risk and potential liability metrics that may jeopardize an organization. The Test Details Report lists pertinent information and hyperlinks directly to cells in question for management analysis. Custom Reports offer users to add notes alongside test results. Configurable report options can give users even more visibility into their spreadsheets
